

CHECKCARD - Cylinder Net

NETS, PATTERNS & GRAPHICS
By Peter Sellwood

Directions:

The net below shows you how a cylinder container can be made.

1. Draw out your pattern on CheckCard.
2. Cut both pieces on bold lines. (Pinking shears will work for cutting notched sides.)
3. Form the large piece into a cylinder-like shape. Overlap and paste the straight edges.
4. Fold notched edges toward the center.
5. Draw a circle for the base and cut it out. Paste to the notched edges to make a bottom for the container.
