

Symmetrical Creatures

We are studying about shapes that have symmetry. Through our math and science studies lessons, we discovered that butterflies are symmetrical.

Challenge:

Design and create an imaginary symmetrical creature.

Criteria:

Your symmetrical creature must –

Δ be identical on each side.

Δ be attractive.

Δ have at least 2 moving parts.

Δ must be flat.

Δ must have between 5 and 12 different shapes.

Materials: You do not have to use everything.

*construction paper

*scrap paper

*yarn

*brads

*glue

*recycled materials provided by your teacher

Tools :

*scissors

*pencils

*ruler

*pushpin paper drill
