

Field Day Snack Boxes

Your school is planning for its annual field day. Your class has been given the responsibility of providing containers for participants to use to hold small snacks. Time is short and you'll have to work quickly to make enough for the whole school.

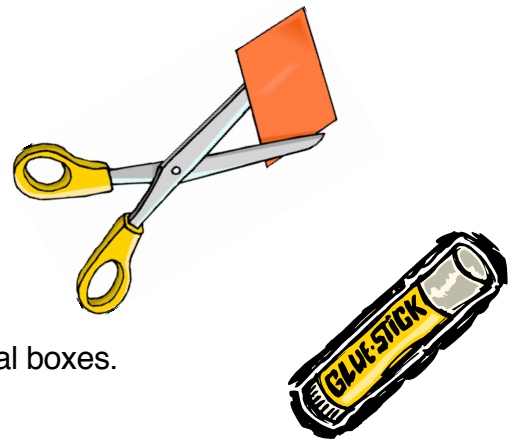

Design Challenge:

Design and create a pattern for a field day snack holder. The container should have a top to keep in the snacks. All of the containers will have to be the same size and look alike to avoid complaints.

Criteria:

Your container must

- have a top.
- be all one piece.
- be 6 inches or less on each side.
- be neatly constructed.
- be used as a pattern to create at least 5 additional boxes.
- be able to hold popcorn without it falling out.

Materials: What can you use?

- card stock or Checkcard
- paste, low heat glue gun (with supervision), or clear tape
- pencils
- scissors
- rulers
